	X	OTHER
TYPE OF SERVICE, PRODUCT, ACTIVITY		SPORTS
		ACTIVE LEISURE
	X	BOTH
TYPE OF ACTIVITY		INDIVIDUAL
		GROUP
	X	BOTH

#### 1.4. CASE STUDY DESCRIPTION:

PANTHOS was born in 2016 and has become a benchmark for water activities in Extremadura. Their experiences are based on innovation and respect for the environment and they do it from an inclusive prism, so that all people, regardless of their limitations, have access to them. They organise all kinds of water-related activities for visitors to the North of Extremadura as well as for groups, families or corporate events.

PANTHOS is formed by an itinerant crew but its main bases are located in the Gabriel y Galán Reservoirs, in the North of Cáceres and the Valdecañas Reservoir, next to Navalmoral de la Mata in Extremadura, Spain.

They have also specialised in Astrotourism and show the Extremaduran sky from unique places making the experience unforgettable.

In PANTHOS they adapt their materials and knowledge to the three main areas of disability:

- Physical disability
- Intellectual disability
- Sensory disability

They contribute a great number of activities to the tourist offer in the North of Extremadura and generate a great number of experiences together with the wide network of collaborators they have, in such a way that they expand their aquatic offer of astro-tourism with others such as gastronomy, nature tourism or multi-adventure. They are less than an hour away from the most visited regions of Extremadura, Tierras de Granadilla, Ambroz, Valle del Jerte, La Vera, Sierra de Gata, Hurdes or Monfragüe.

They also have a team of professionals with experience in Water and Wind Sports as well as complementary activities such as Coaching and Leisure and Free Time.

Panthos is a referent of water activities in Extremadura with two nautical bases at present, in the Gabriel y Galán Reservoir and in Valdecañas Island, they offer the possibility of practising all kinds of water-related activities

They are also specialised in Astro Tourism, being the only inland water company that navigates at night, which makes stargazing unique.

In Panthos, they count with a wide network of collaborators with different types of accommodation, alternative water activities, unique gastronomic experiences or coaching.

They also collaborate with different Administrations for the organisation of large events and consulting.

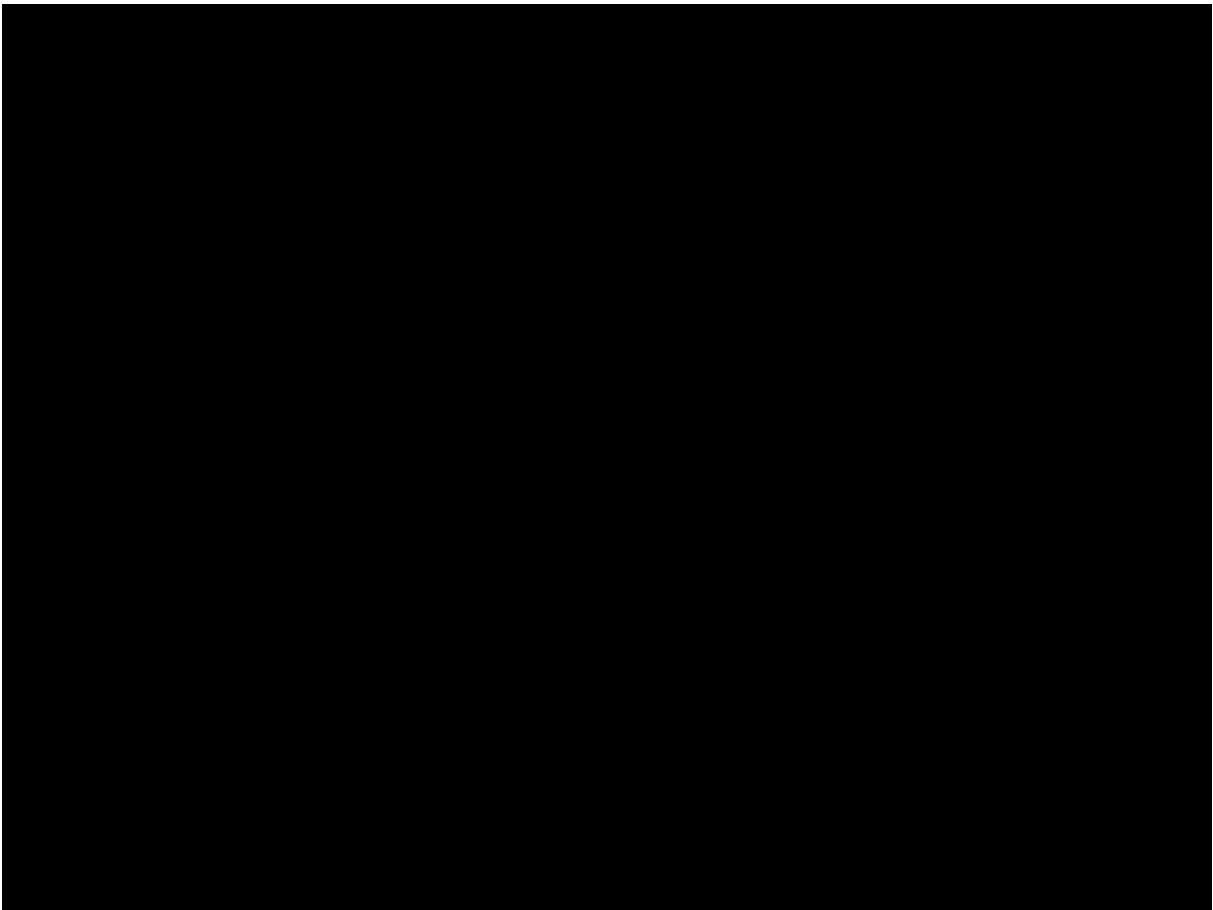

It's the first Nautical School in Extremadura approved by the D. G. of the Merchant Marine for the teaching of Recreational Nautical Titles such as the Navigation License or the Basic Navigation Skipper.

It is a multidisciplinary team because PANTHOS is formed by a diverse crew of experts in navigation, Sport Technicians, Environmental Guides or Night Sky Guides proud to work from an inclusive prism.
